Art Unit: 3751

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Bruni et al. Reference pertains to a shroud-type device for upright cylinders to confine and neutralize already leaking gas that utilizes a source of purge gas, the Kawaguchi et al. reference pertains to a screw-on type device for bomb cylinders with an associated purge gas source and gas detector, and the Caparros reference pertains to a train transport-type cylindrical tank with a valve box disposed on its side walls.

The following is an examiner's statement of reasons for allowance: none of the prior art, alone or in combination, teaches Applicant's invention of a system for transportation and storage of a product comprising a cylindrical tank, a valve box with process valves having connecting pipes disposed on the sidewalls of the tank, and a purge valve and pressure measurement means in fluid communication with the valve box (i.e. Examiner cannot find any reasoning, other than hindsight reasoning, to modify a transport system such as Caparros to have purge systems such as those shown by Bruni et al. and Kawaguchi et al. used on much smaller vertical gas cylinders that don't have valve boxes and are used in a more reactive manner).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

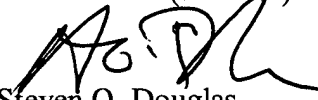

Claims 1-25 are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven O. Douglas whose telephone number is (571) 272-4885. The examiner can normally be reached on Mon-Thurs 6:00-6:30.
